How no HAVE MEALY POTATOES. e a yery common thing in the spi and strong, watery potatoes on the table, unless care has been taken to select and unless care has been taken to select and preserve them. A poor potato is the poorest article of food that can be had; and as soon as they begin to sprout they begin to grow poor and watery, the better part of the root going to the support of the sprouts; hence, to have mealy, nice potatoes, it is necessary to keep them from exhausting themselves in this way. An exchange gives the following method of preventing the potatoes from sprouting, which we hope will be tried and approved: Take good, sound potatoes and place them in a tub or barrel, and pour boiling water over them, letting them remain in the water until the eyes are scalded so they will not sprout; dry the potatoes they will not sprout; dry the potatoes thoroughly in the sun, and put them away in a box or barrel in a cool, dry place. This will give good mealy potatoes all the

A SENTLEMAN of Rochester was lately in Saratoga county, N. Y., and was there shown an apple-tree in a fine healthy condition, which had been ill, subjected to treatment with calomet, and thoroughly oured. This tree was afflicted with sects, which were destroying it, rosdering it unproductive. A bole was bored into the body of the tree nearly through the sap, and two grains of calomel inserted. As soon as this caloniel was taken up by the sap, the vermin on the tree died, and it began to bear fruit, and has done so for three years to the en-tire satisfaction of the owner,

ANTIDOTE —A poison of any conceivable description and degree of potency which has been swallowed intentionally or by accident, may be rendered almost instantaneously harmless by swallowing two gills of sweet oil.
